Report Run Date As Of : 9/23/2013 2:57:30 PM

Data FROM Data Mart

The initial group or cohort of first-time students is evaluated **six years after initial enrollment** in order to determine if they have shown behavioral intent to transfer. If by **six years after initial enrollment a student has completed twelve credit units and attempted transfer-level math or English**, the student then **enters into the Transfer Cohort** and that student's transfer outcome is calculated for a variety of time frames ranging from three years after initial enrollment to as high as twelve years after initial enrollment, time allowing. Obviously, more recent cohorts will have a smaller range of time windows available with the more recent cohort showing transfer rates for just three years, four years, five years, etc. after initial enrollment at a CCC.
