

5.12.21 Technology Committee Meeting Notes

Metrics Discussion

Things that came to mind that would be good to track that we don't have access to via the data warehouse:

- Technology that has been loaned out (computers, hotspots, etc)
- Use of computer labs - is this tracked by ID? At all?
- Licenses of X, Y, and Z software given out - tracked by ID?

Student survey data review

- Data from surveys shows many students using mobile devices/phones as main way to interact with classes, reveals many students are not aware of some resources such as technology loans.

Canvas usage data review

Will review summarized data

Data from ITS re: rental data

N/A

Task Force Discussion

Meet: Twice over the summer, work will help inform Flex day plans and upcoming PD priorities.

Review Website for Updates

Initial review, main suggestions are to condense meeting links and include simplified links to past meetings.
